Introduction

Although Mental Health First Aid Australia is not a mental health or referral service, an important role of a Mental Health First Aider is to encourage appropriate professional help.

There are many different types of treatments and supports available that can help a person experiencing mental health problems to function better and aid their recovery. Being aware of some of the different types of supports available can help a person choose options that are right for them.

This resource lists both veteran specific and civilian support services. Telephone numbers are included where relevant, and for those accessing this resource online, you can select the service name to be taken directly to the associated website.

You can use this resource as a reference point when helping to connect a person from the veteran community with professional help. Remember, a consultation with their general practitioner (GP) is often a good place for a person to start.

National mental health crisis numbers

If you or someone you know is in immediate danger, call Triple Zero (000) as soon as possible.

If urgent help is required, the following services are also available 24 hours a day, 7 days a week:

Lifeline (Call 13 11 14)
